10. Other: \_

Continuation of 5. does NOT place the application in condition for allowance because: with regards to Applicant's argument that the Thomas' marking tape 22 throught out the length will interfered with direct surface-to-surface contact, create friction in securing the vertical studs in abutting relationship with the to and bottom plates. Examiner does not agree because firstly, claim1 recites the stud markings spaced along the length and secondly, the typical marking tape is relatively thin and when fastening studs to end plates would not cause any interference in terms of dimension and friction between studs and end plates.
